Re: Cedar Springs Thank You

---

---

Mr. Clark,

I want to thank you personally for the high quality installation at the Bank of America on Cedar Springs Road in Dallas. During turnover of the bank, the owner representatives and end users alike were thrilled with the quality of the finished product. I was proud because I knew what they were saying was true. I also know that it is your commitment to quality that helped to get us there. I am accustomed to pushing for better quality from my subcontractors and am more than pleased that instead of having to push you, you were already there with high standards.

The team mentality WCS brought with them to my project turned major issues into minor issues. Your willingness to help find resolutions to problems that were not your own did not go unnoticed.

You and the team that you led made that project a pleasure. Your people are friendly, courteous, professional, and work willingly to the standards you exact for them. I look forward to many more projects with you and your company.

Thank You  
R. Taylor Strange  
Superintendent  
Centex Construction
